PROcedures for a confirmed COVID-19 case

What should I do when a participant tests positive for COVID-19 and takes part in an organized activity within the previous 14 days?

☐ Immediately notify the Federation by email at covid@hockey.qc.ca, then notify your region/organization by email;

☐ Immediately remove the participant from the hockey community, as well as any person from the household residing with the latter;

☐ Obtain a medical certificate or sign the return to activity consent certifying that he is fit to return to play before returning the participant to his activities;

☐ Notify anyone who has been in contact with the person who tested positive for COVID-19 that they must remain in isolation for 14 days after their last contact with the confirmed COVID-19 case even if they have been tested for the COVID-19 and the result is negative;

☐ Apply all other guidelines from the public health authority.

For participants who:
- have potential symptoms of COVID-19 and do not show up for activity;
- show symptoms during activity;
- have been in contact with a confirmed case of COVID-19.

Please apply and follow the steps included in the intervention guide

Confidentiality is of the utmost importance and must be respected by all members of the association/organization regarding all files, including those relating to COVID-19.
